

Assembly  
STAGING - POTTING TABLE - PATIO TABLE

Components:

4 Posts  
8 Baton Boards  
Bottom Shelf

Table Top  
8 Short Plastic Slats  
8 Long Plastic Slats

1. Slide a short Plastic Slat into the end of a post. Repeat with a 2<sup>nd</sup> Slat at right angles to the 1<sup>st</sup> Slat. Repeat with all four Posts. Note: the Plastic Slats will each face an opposite post.
2. Keeping the short Plastic Slats to the bottom of the post, slide down a Baton Board to join two posts. The Baton should face the inside of the table and be at the bottom of the post. Repeat with the other Baton Boards to make a rectangle.
3. Place the bottom shelf resting on the Batons Boards.
4. In the same way that you placed the slats into the bottom ends of the Posts, now slide Long Plastic Slats into the posts above where you placed the first ones.
5. The last four Boards slide between the posts as before. The Batons go inside and at the top.
6. Place the top shelf resting on the Batons Boards.
