

Assembly

RAISED BEDS and RAISED BED MODULES
No nails, no screws, no holes to dig

Contents:

Posts = 4 for full bed – 2 for add on modules. Height dependant on bed ordered.

Boards = 4 per layer for full bed / 3 per layer for add on module

For Long/Handy Beds there will be two sizes of board for opposite sides

For the Beds

1. Slide a groove of a corner post over one end of a board
2. Take a second corner post and slide it over the other end of the board.
3. Repeat to form a square or rectangle
4. Build up the sides to the top of the posts

We recommend you place a flat stone or piece of slate under each post when in use. Or, you can use Post Slippers as found on our website www.GardeningWorks.co.uk

For the Add on Modules

1. Repeat the above method of assembly using the two posts on one side of the four sided unit to support the Module.

Spare boards and posts are available via www.GardeningWorks.co.uk

We have addressed the source of all the wood used in making these Compost Bins. This is slow grown in the very north of Sweden has lasting properties due to the closeness of the rings in the wood. We have used a non-toxic wood preservative. To extend the life of your Raised Beds we recommend that you treat it every few years with a similar wood preservative. It is an opportunity to reverse the boards and posts to even out wear. We have pots of the original colour Croma for sale, see website.
