

Assembly

**TORTOISE VIVARIUM HIBERNATION HOMES
TORTOISE RECREATION PENS**

Assembly: No nails, no screws, just slide the parts together

Contents: VIVARIUM, HIBERNATION HOME

4 Posts	Floor
Boards	Lid
4 Baton Boards	

1. Make a Square with 2 Baton Boards, 2 Boards and the 4 posts. Batons go to the bottom and face inside the box.
2. Lay the floor on the Baton Boards.
3. Build up the sides of the box placing the remaining 2 Baton Boards opposite each other, batons facing inwards.
4. Place the lid on top.

Line with newspaper, and use lots of Straw to insulate the box. Post slippers may be included and can be fixed to the bottom of the post with Low modular silicone.

Contents: TORTOISE RECREATION PENS

6 Posts	2 Baton Boards
2 Short Boards	Lid
Boards	

1. Make a 3 sided box by sliding posts over the ends of three boards.
2. Add another layer to these three sides, making each side 2 Boards deep and placing the 2 Baton Boards on opposite sides of the top layer to support the lid.
3. Next place the two short boards down one post on the fourth side. The gap will allow the Tortoise to move in and out of the covered pen whilst keeping the box private and secure.
4. Follow by adding more Boards, two layers high for the pen slide them down the remaining posts to form a run that the tortoise can enter through the gap.
5. Place the lid over the batons.
