

Manger Beds Assembly Instructions

Firstly, assemble the two sets of legs by joining them using the pre-cut joints.

Please note how one of the channels is blocked at the centre of the X.

Select one of CUT AWAY BOARDS and slide this down the channel so that the wide end comes to rest on to the 'stop' mentioned above.

Position the second set of legs, so that the end of the first board can slot into a channel that runs the whole length of the inside of the leg.

Your Manger Bed, should now look like this.

Take the second Cut Away board and slide it down the opposite side in the reverse position to the first board.

The wide part of the second board should come to rest on the stop, as did the first. You will probably have to move the narrow end of the first board, so that the second board can slot into position.

The base of your Manger Bed, should now look like this.

If your boards are insert correctly, then if you roll the Manger Bed over, the underside of the first two boards should look like this.

The remaining boards can now be slid on top, with the end pieces into the centre of the X piece
