

## **LIDS**

Boards with batons should be placed on the top row on the outer sides, far left & far right of the assembled bin.

Batons face inside and the Lid sits on top.

Double Baton boards are for between adjoining bins.

## **ADVISORY**

When installing new lids please keep a close eye on them during the first few months as the wood has not yet seasoned and may warp during the changing weather. If there are any signs of warping please turn the lids over to help straighten them and repeat this a few times if needed – once the lid has had time to adjust it will keep straight.

If the wood is allowed to warp too much it will split from the batons and may break the screws.
