Contents: WOODEN LEAF COMPOSTER MODULE

| | |
|--------------------|--------------|
| 2 x Posts | Zip Ties |
| 6 x Boards | 3.5m Netting |
| 6 x Plastic Strips | |

WOODEN LEAF COMPOSTER

1. Make a square with the Posts and 4 x Boards
2. Slide a Plastic Strip down a Post groove above the end of one of the slats. Repeat until there is a strip above each end of each board.
3. Finish off by sliding the remaining Boards into the frame.
4. Unroll the netting and place inside the frame. Secure with Zip Ties.

WOODEN LEAF COMPOSTER MODULE

Modules have three sides to enable them to be an addition to a larger unit. For example another Wooden Leaf Composter or a Combination of your choice. Therefore they need to attach to one side of another product.

1. Make a 3 sided unit with the 2 x Posts and 3 x Boards. Attach this to one side of another product, include the two posts on the chosen side.
2. Slide a Plastic Strip down a Post groove above the end of one of the slats. Repeat until there is a Plastic Strip above each end of each of three boards.
3. Finish off by sliding the remaining Boards into the frame.
4. Unroll the netting and place inside the frame. Secure with Zip Ties.
